EN

Gold Gıda was established in 1994 in the village of Sevketiye, located on the slopes of Uludag, with the purpose of fruit cultivation. Later, in the pursuit of finding better markets for the carefully cultivated produce, the company expanded its fruit sales beyond its production capacity, reaching a capacity of 15-20 thousand tons with the experience and knowledge gained from fruit cultivation. Our goal is to work towards achieving the place that Turkey's agriculture and farmers deserve and to make our company and our country a leading player in the global frozen food market.
